Document Management for Any Size Business

For over 20 years our application was at the forefront
of document management in Higher Education.

Beginning 2016 this same application is now available to businesses.

Paradise Software has been in the document management business since 2007. Our United Kingdom partners, EcoDox U.K. since 1993. Together we now offer this proven, enterprise solution to the business community. We priced our hosted solution so even the smallest business can now enjoy the benefits document management previously enjoyed almost exclusively by large institutions

Your documents are securely stored by one of the world's foremost leaders in document storage, 1&1, with approximately 70,000 servers in operation. If your server's first location is unexpectedly interrupted, your site will automatically continue running in a second location without any data loss. Redundant technology guarantees the highest reliability. If a server experiences issues, a second server automatically takes over. 300 Gbit/s external connections ensure fast access times. For more information you can visit their site at www.1and1.com.
